

Puppy Socialization

A six-week training class for puppies ages 12 weeks through 24 weeks. Designed to help you and your puppy bond and build confidence through training. This class also includes puppy play time that will help you and your puppy understand appropriate dog interactions, behaviors, and play styles!

The best time to set your dog up for success is from the very beginning! The window for adequate socialization for your puppy is relatively small but you can accomplish a great deal of things in that time frame. We will help you introduce your puppy to all of the basic canine life experiences so they will be prepared for anything, any time, anywhere!

All puppies must be up-to-date on age appropriate vaccinations.
